

McAdam

Village Council Meeting
October 29, 2008

RESOLUTION

"That due to the many environmental and health concerns, we the council for the Village of McAdam are adamantly opposed to the mining of Uranium in the Village of McAdam as well as within the Parish of McAdam within which can be found the Chipineticook System of Lakes and the St. Croix River Watershed.

It is further concluded that whereas the Village of McAdam is surrounded by a diverse system of waterways it is our opinion that the mining of uranium would have a negative impact upon the recreational opportunities afforded this region." **MOTION CARRIED**
